+91 7209703947 | ankit.kumar971@outlook.com | [linkedin.com/in/ankitkhatriofficial](https://www.linkedin.com/in/ankitkhatriofficial)

Experienced software engineer with 3.5+ years in cutting-edge technology and DevOps practices, driving impactful solutions for tech companies.

SKILLS

Technical Skills:	Data Structure & Algorithms, Problem Solving, OOPS, AOP, System Design.
Language & Frameworks:	Core Java, Advanced Java, Spring Boot, Hibernate, Spring JPA (Java Persistent API).
DataBases:	MySQL, MongoDB, Redis, Elastic Search, Spring H2.
Messaging System:	Apache Kafka and Apache Nifi.
Containerization & Orchestration:	Docker, Kubernetes, GKE (Google Kubernetes Engine), GCP (Google Cloud Platform).
CI/CD & Version Control:	Jenkins, Git, Github, Bitbucket.

EXPERIENCE

SDE-I | Birdeye (Gurgaon, India) Jan 2022 - Present

- Worked upon Birdeye (a SaaS based MNC) Top Payments projects like ACH, Webforms, QR and Recurring Payments.
- Implemented Redis cluster cache and Circuit Breaker in Birdeye Payments to achieve higher performance and fault tolerance.
- Contributed to Stripe's Terminal and Quickbooks (Intuit Product) Integration with Birdeye Payments.
- Developed AWS secret manager in Birdeye's microservices - payments & messenger.
- Worked upon various other technologies like Apache Kafka, Apache Nifi, MongoDB, Redis, Elasticsearch and Kibana dashboard.

Backend Engineer | Freelance (Remote, India) Feb 2021 - Jan 2022

- Worked with more than 8+ startups to develop their websites, Dashboard tool, CRMs and Backend architectures.
- Have made good connection with 40+ persons including these all 8 startups.
- Learned client conversation, product management, customer satisfaction etc.
- Technology used: Java, Spring Boot, MongoDB, MySQL and ReactJs for UI development.

EDUCATION

MAIT (Maharaja Agrasen Institute of Technology), *B.Tech - CSE* | Rohini, Delhi GPA: **8.9 / 10**

PROFILE LINKS

• [Portfolio](#) • [Medium](#) • [Leetcode](#) • [Github](#) • [GeeksForGeeks](#) • [Hackerrank](#) • [Twitter](#)

ACHIEVEMENTS

- Solved more than **800+** DSA problems on **Leetcode**.
- **5*** star in Java and **4*** star in **Problem solving** on Hackerrank.
- **3 in a row hackathon winner** at Birdeye. First hackthon project was a product feature and second one was built on AI using **chatGPT** and **generativeAI** apis and third one was on **data visualization graphs**.
- Ranked First in Dev challenge among **350+** participants organized by **IOSD MAIT**.
- **College Topper** in Diploma batch 2016-2019.
- One of my article on medium got requested to be published by **towardsDev**.
- Have a strong network in freelancing world. Worked with many small startups.

PROJECTS

Electronics Tweaker

- A fully functional web application where user can request service for any kind of damaged electronic products.
- Real time engineer allocation & completion of service status along with integration of google maps.
- Tech stack used: Java, Spring Boot, Spring Security, JPA, MongoDB.

Trail Inventory

- It is a fully inventory management tool where business users can manage their inventories, prices, and keep track of their sales and profit.
- Tech stack used: Java, Spring Boot, MongoDB, and ReactJs.

Motel Lookup

- An online place to get all hotel deals and easy options available to book rooms online, see bookings, and transactions.
- Have the option of Admin Panel Dashboard to control and manage the website in real-time.
- Tech stack used: Java, Spring Boot, MongoDB.
